-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 September 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Applicant's election with traverse of group I, claims 1-5 in the reply filed on 25 September 2006 is acknowledged. The traversal is on the ground(s) that the examiner has not provided adequate reasons/examples to support the contention that the product could be made in a materially different process. This is not found persuasive because while applicant's argue that their apparatus is a "type of fluidized bed" it does not fall within the conventional meaning of fluidized bed as it does not include a "bed". The bulk transport within the gas stream **(30)** does not fall within the scope of a conventional fluidized bed. US 6139313 is further provided as evidence that similar apparatus are not considered by the art as limited to use in the dehydroxylation of aluminum silicates. Finally, examination of all claims would constitute a serious burden on the office as the scope of search and consideration for each group is not commensurate.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3021195.

Examples 1 and 5 of the patent teach metakaolin formed by dehydroxylating kaolin in a stream of hot gas maintained at 700-800 C. The similar starting materials and process by which the kaolin is treated would be expected to produce metakaolin having a similar reactivity.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by 4994114.

Table II examples 1 and 2 teach metakaolins having a Chapelle reactivity of greater the 0.77. While the reference does not explicitly disclose the PR, as defined in the instant application, a Chapelle reactivity that high would be expected to translate to a PR at least as great as the instant claims.

Claims 4 and 5 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may not depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 4 and 4 have not been further treated on the merits.
